All prices expressed in U.S.\$/MMBtu and based on indicative data obtained from traders, exchanges and deals provided by energy companies. "Fixed" prices (page 1) represent the indicative forward prices of gas delivered for each reference period at the various locations/hubs. "Basis" prices (page 2) represent the differential, for each reference period, between the Henry Hub and various locations/hubs. The Summer and Winter prices are simple averages of April-October (7 months) and November-March (5 months) respectively. "Bal <Winter/Summer>" prices represent simple averages of the remaining months in those seasonal prices (after at least one month has passed). For more information, please call Dexter Steis at 703-318-8848.
